

Antonia Precali

Hi, my name is Antonia. I was diagnosed with type 1 diabetes when I was 11 years old, just a few weeks before my 12th birthday. I have been living with diabetes for 10 years now and I am trying to fulfill all my dreams in spite of it. The main reason for joining YLL is to meet new people and hear their problems, but also to learn from them and gain new perspectives. I believe that the more we learn from each other, the more we grow as people!
