

# Alexandre Hilário

I was diagnosed with type one diabetes in November 2014. I work in Quality Assurance at a Software company. I enjoy social gatherings and having a drink with friends or making new friends on the fly while at a bar or someplace like that. I love CS:GO esports and often do casting for amateur and semi-pro leagues and tournaments. I joined the Youth Leadership Lab and want to be an advocate for diabetes because my relationship with the disease changed completely for the better when I met and started interacting with other people with diabetes, so I want to make a difference and create opportunities for people who feel alone or never had contact with another diabetic person so they can feel better and make friends!
