

Darija Orozović

I come from Serbia and I am 22 years old. Since I was 8, or more precisely since 2007, I have been living with my companion - diabetes. After graduating from music high school, I finished my basic studies in dietetics and I am currently finishing my master's studies in the same field in Slovenia. Because of my acquired knowledge of ethno singing, I love music in general, and therefore art, photography and everything creative. I wanted to join this year's Youth Leadership Lab for one reason only. Having more knowledge, desire, and skills to help someone who lives similar to me or just to understand even more the beauty of diversity in all of us. I think this is a very important decision!
