

Ines Jakopanec

I was diagnosed with Type 1 diabetes on 12th April 2005. I have a master's degree in architecture and urbanism, but my work today is in graphic design. I love to help young people with diabetes in Croatia and beyond. In 2016 I started to help my local association with ideas and organising a few events, and then in 2019, I became an active advocate for diabetes at the international level. Today I'm proud to be a part of the YOURAH network because together, we can motivate and educate youth for a better tomorrow.
