

Lucija Mušćet

I was diagnosed in 2004. I study Geodesy and Geoinformatics in the Faculty of Civil Engineering, Architecture and Geodesy. Becoming part of Youth Leadership Lab gives me an opportunity to have a positive impact on all people living with diabetes and to show that diabetes doesn't have to be a negative part of our lives. We can really change how people look at diabetes and keep improving our rights and quality of life.
