

## **TANJA SHATANOVSKA**

I was diagnosed with diabetes at 6 years old (16.10.1998). I work as a content writer at Clikdaq and Blogger ([www.diabetesismylife.com](http://www.diabetesismylife.com)) My interests are reading books, writing about my experience with type 1 diabetes, meeting new people, exploring new places and cultures, and pilates. I would love to join a powerful diabetes community with people from across Europe, where we will be able to connect, learn from each other, raise awareness about diabetes and provide support.
