

# Naroa Asensio

In 2012 I was diagnosed with Type 1 diabetes. I have finished high school and I am going to start university this year. I love science and it will be a good opportunity to improve my knowledge. I like to play sports, sing, take photos and be with my friends and family. Moreover, I like to help people with diabetes to improve their health. This community is a great way to get to know the situation in each country regarding diabetes and to improve the situation around the world. Together we can!
