

Urtė Marija Eitminavičiūtė

I was diagnosed with type 1 diabetes in 2008. I am a 4th year Medicine student, studying at Vilnius University. I'm very happy and grateful to be part of this year's IDF Youth Leadership Lab! I believe there are many misconceptions and misunderstandings when it comes to living with diabetes. As much as I like dispelling myths and educating others, I enjoy learning from others even more, especially from people in different areas of interest than mine. By being part of the Youth Leadership Lab, I hope to learn valuable skills in leadership, networking and to experience what it's like to develop a project, all whilst collaborating with equally enthusiastic peers!
